

# Kyle Whelan, Software Developer

Camberley, United Kingdom, 07523309779, kyle.aj.whelan@outlook.com

---

## PROFILE

Dedicated and highly motivated college student working towards an Extended Diploma in Games Development, with several years of experience in programming, including proficiency in JavaScript / Node.js, HTML, CSS, and C#. I will gladly work both independently and with other developers of differing levels.

---

## EMPLOYMENT HISTORY

Jun 2022 — Jun 2022

### Work Experience, TRL Software

Wokingham

While undergoing my studies at Farnborough College of Technology, I had a week of work experience at TRL Software. During this, I gained an insight on the process behind the development of an application.

Throughout this work experience I spoke to their head of Software Development on the software development life-cycle and the differences between the agile and waterfall methodologies. I also participated in their sprint planning event of an agile SCRUM from one of the companies' development teams. Along with this, I was given a walk-through from their development team lead on source code control and build pipelines, as well as their process to creating user interface elements.

---

## EDUCATION

Sep 2017 — May 2021

### Collingwood College

Camberley
